

## **Voter Representation/ Electoral Systems (adopted 2020)**

*Statement of Position on Voter Representation/Electoral Systems as adopted by LWVUS by concurrence by the 54th National Convention in June 2020, and adopted by LWVPWM by concurrence in May 2021.*

LWVUS promotes an open governmental system that is representative, accountable, and responsive. We encourage electoral methods that provide the broadest voter representation possible and are expressive of voter choices.

Whether for single or multiple winner contests, the League supports electoral methods that:

- Encourage voter participation and voter engagement
- Encourage those with minority opinions to participate, including under-represented communities
- Are verifiable and auditable
- Promote access to voting
- Maximize effective votes/minimize wasted votes
- Promote sincere voting over strategic voting
- Implement alternatives to plurality voting
- Are compatible with acceptable ballot-casting methods, including vote-by-mail The LWVUS believes in representative government.

The League supports electoral systems that elect policy-making bodies—legislatures, councils, commissions, and boards—that proportionally reflect the people they represent. We support systems that inhibit political manipulation (e.g., gerrymandering). The LWVUS supports enabling legislation to allow local jurisdictions to explore alternative electoral methods, as well as supporting state election laws allowing for more options at both the state and local levels. With the adoption of any electoral system, the League believes that education of the voting public is important and funding for startup and voter education should be available. We encourage a concerted voter education process.
